- Toca provides a blueprint for architecture modernisation and unlocks contextual AI
- Customers can self-serve with a singular, secure, affordable and modern user experience

# THE EFFICIENCY UPLIFT

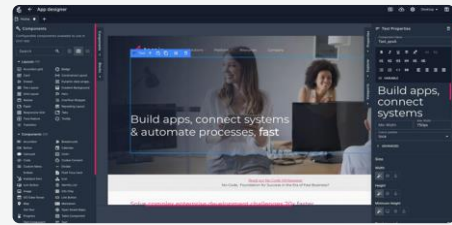

## HARNESSING DATA AND APPS

# HOW

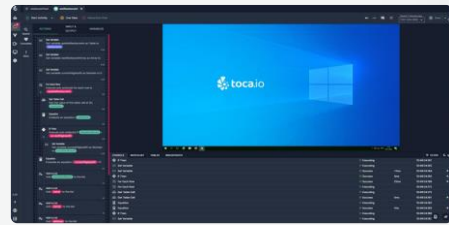

## APPS

### RAPIDLY BUILD YOUR OWN APPS

Rapidly build enterprise-ready apps, from simple web portals to complex, logic-based applications using our simple drag & drop designer. Seamlessly integrate apps with automation projects, and transform business processes.

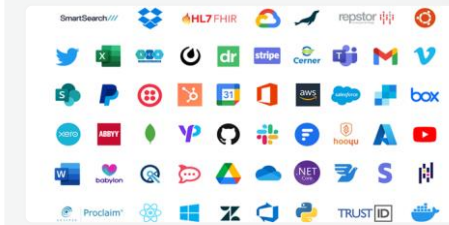

## AUTOMATION.

### CONTROL, INTEGRATE & AUTOMATE ANY SYSTEMS

Powerful combination of RPA, direct API integration and data analytics allows you to integrate and control any system, transform any data, and build automations and workflows.

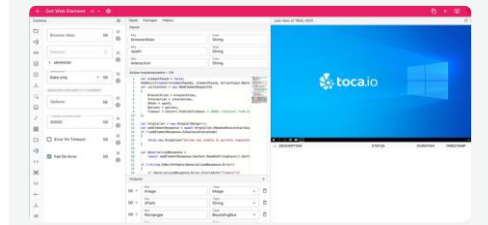

## INTEGRATIONS

### CONNECTIONS READY OUT OF THE BOX

Take advantage of our repository of pre-built connectors for the most common apps and technologies, such as Microsoft 365, Teams, Azure, Google Workplace, Slack, Twilio, Hubspot, Salesforce and more.

## DEVELOPMENT TOOLKIT.

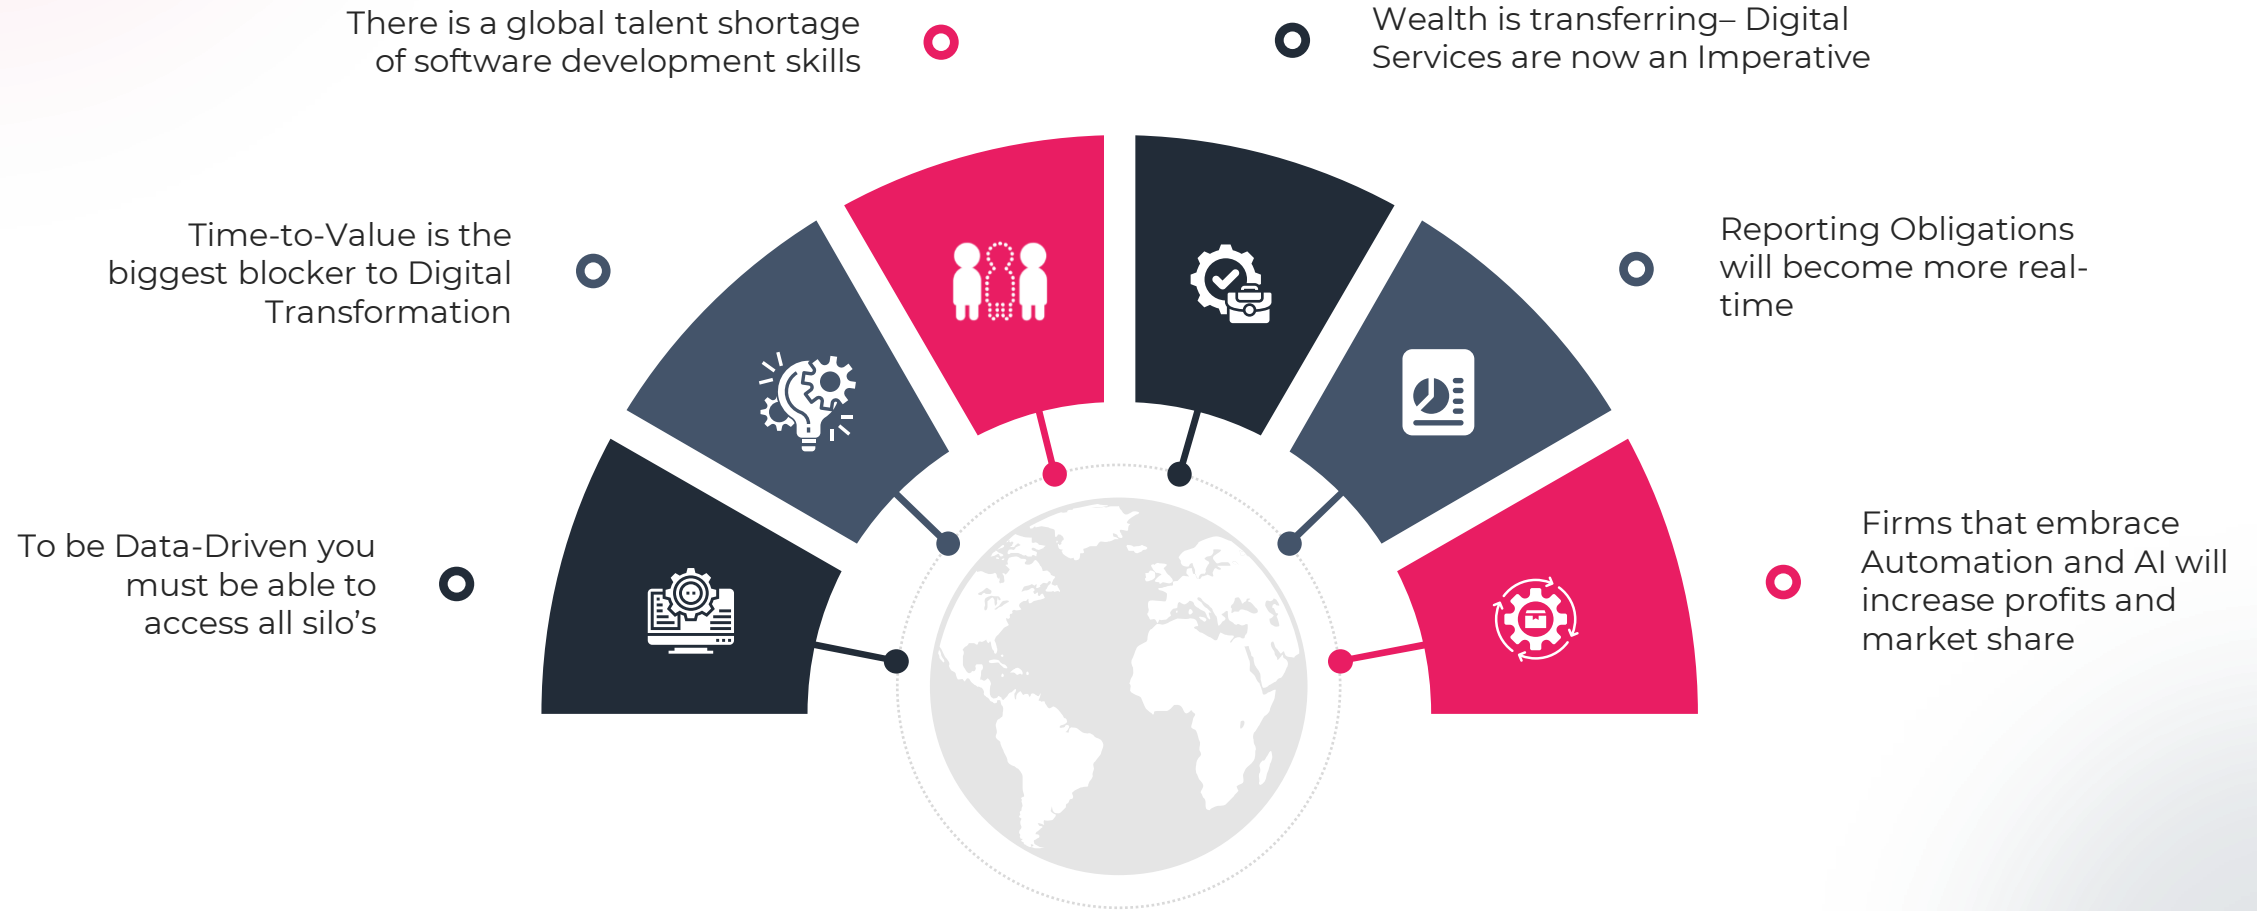

### FREELY EXTEND THE CORE CAPABILITIES

High-code meets low-code - Toca is freely extensible via the built in software toolkit and browser-based IDE. Extend and publish actions and components on the fly, using C#, Python and React.

**TOCA'S ACCELERATES TIME TO VALUE BY OVER 20X** The typical project team size is reduced by 90%
